1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a particular structure of a bandgap voltage reference circuit including first and second current densities being provided in a chain coupled to the first and second input node, respectively, classified in class 323, subclass 315.
 - II. Claims 17 and 18, drawn to a particular structure of a bandgap voltage reference circuit defined by a current applied across a single resistor at the output of the amplifier, classified in class 323, subclass 312.
 - III. Claims 19-23, drawn to a particular structure of a bandgap voltage reference circuit for providing a measurement of temperature, classified in class 323, subclass 907.

The inventions are distinct, each from the other because of the following reasons:

2. Invention II, and inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the bandgap voltage reference circuit as claimed in Group II (claims 17 and 18) does not necessary to contain particular elements as recited in claims 1-6 of Group I and/or claims 19-23 of Group III. The subcombination has separate utility such as the bandgap voltage

Art Unit: 2838

reference circuit in Group I and Group III can be used without the presence of the first and second densities as claimed in Group II.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Applicant is suggested to elect only one Group of claims at the time.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew V. Nguyen whose telephone number is (571) 272-2081.
